

Technology Stack

Date	29 June 2026
Team ID	XXXXXX
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose
1	Frontend / Client-Side	React (Vite), HTML, CSS Modules, JavaScript	Used to build a responsive, fast, and user-friendly interface with reusable components.
2	Backend / Server-Side	Python (FastAPI)	Handles API requests, business logic, and communicates with the AI service efficiently.
3	Database / Data Storage	SQLite, Browser Local Storage	Stores user and loan information locally in a simple and lightweight way.
4	Cloud / Hosting / Deployment	Localhost (Development Environment)	Used for project development and testing. Can be deployed to a cloud platform in the future.
5	Version Control & CI/CD	Git & GitHub	Used to manage source code, track changes, and support team collaboration.

6	Third-Party APIs / Other Tools	Google Gemini API, Axios	Gemini API provides AI- based financial analysis, while Axios is used for communication between the frontend and backend.
