

No. of Functional Features Included in the Solution

Date	02 July 2026
Team ID	XXXXXX
Project Name	AI Powered Debt Relief & Financial Recovery Platform
Maximum Marks	5 Marks

Functional Features Overview:

This document lists all the functional features included in the project solution. Each feature is described with its purpose, implementation status, and contribution to the overall solution.

S.No	Feature Name	Feature Description	Module / Component	Status (Done / In Progress / Pending)	Marks Contribution
1	User Registration & Login	Allows borrowers to securely create profiles and authenticate their identity via passwords.	Security / Backend Authentication	Done	Core Baseline Feature
2	Loan & Financial Data Input	Forms that capture outstanding loan amounts, monthly EMI burdens, income, and overdue timelines.	User Interface (UI) Forms	Done	Core Baseline Feature
3	Financial Health & Stress Analytics	Algorithms that evaluate user profile arrays to compute leftover surplus cash and overall debt stress scores.	Backend Core Logic Engine	Done	Core Baseline Feature
4	Interactive Metrics Dashboard	Displays graphical/visual indicators summarizing a borrower's surplus ratios, debt burdens, and target recovery goals.	User Interface (UI) Dashboard	Done	Core Baseline Feature
5	Intelligent Negotiation Letter Prompting	Packages personal budget and debt variables to trigger dynamic legal negotiation script generation via AI.	API Integration Layer	Done	Core Baseline Feature
6	History Logging & Management	Permanently archives past AI-crafted bank letters and strategic summaries for future reference.	Database / Storage Layer	Done	Supporting Feature
7	Document PDF Export Utility	Formats raw AI-generated letters into print-ready, clean PDF document downloads.	Backend / UI Component	Done	Additional Polish Feature
8	Lender Action Tracker	Simple interactive checklists helping users track response states from bank representatives.	User Interface (UI) Layout	Done	Nice-to-Have Feature

Feature Summary:

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	6
Core / Must-Have Features	6

Additional / Nice-to-Have Features	2
Features Tested & Verified	6

Feature Category Breakdown:

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	Frontend view layout frameworks, input submission fields, and dynamic analytics displays built in React.js.	Data input forms, financial dashboard cards, and the negotiation history table.
2	Backend / Logic	Algorithmic routing paths, request validation mechanics, and automated financial stress math processed via FastAPI.	Debt stress index calculator and monthly household surplus engine logic.
3	Database / Storage	Relational table schemas tracking profiles, user credentials, and communication records via SQLAlchemy ORM.	Local SQLite file writing models for permanent user debt history logs.
4	API / Integration	Outbound connectivity handling web payload structural packaging to external AI instances.	Google Gemini API integration module handling tailored settlement letter assembly.
5	Security / Authentication	Identity verification routines protecting restricted database paths from public access.	FastAPI security utilities for user signup and session verification.
