Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I have too many loan payments every month. • I need a simple way to understand my financial situation • I want clear guidance without complicated financial terms.	THINKS • Will I be able to clear all my debts? • How can I reduce my monthly financial burden? • I need trustworthy advice to improve my finances.
DOES • Tracks loan and EMI details. • Uses the dashboard to check financial status. • Reads recovery tips and financial guidance.	FEELS • Worried about increasing debt. • Stressed due to loan repayments. • Feels hopeful after receiving simple recovery suggestions.

**PERSON
NAME**
Rahul Kumar
(Loan Holder/
EMI Payer)
